## **Central Texas Autism Academy**

*Starting July 7, 2010*

---

### Summary:

This year round therapeutic educational program is geared towards children ages 3-7 with an autism spectrum disorder or other developmental disability who would benefit from learning classroom routines and responding in a group.

The program is led by two Master's level BCBA's with a maximum of 6 students in the classroom. Graduate students from surrounding universities may serve as teaching assistants.

Each student will be assessed using the ABLLS-R and VB-MAPP to develop an IEP for the year. The curriculum is based on these 2 assessments as well as the current Texas Prekindergarten Guidelines and the TEKS for Kindergarten-1<sup>st</sup> grade. Data will be collected on a daily basis to evaluate and determine each student's individual progress. Behavior plans based on functional assessments will also be developed as needed.

Parent conferences and progress reports will occur on a quarterly basis. Data and lesson plans will be sent home weekly.

### Placement:

Enrollment is contingent on the appropriateness and availability of service for the student in the Academy.

To formally apply, we require the completion of our application form and a one-time non-refundable application/assessment fee of \$125 (this does not guarantee placement). (\$100 of this fee can be applied towards your deposit when services begin).

After the application is completed and returned, an assessment is conducted with the student to determine if the student would best be served in our Academy. This

assessment also allows us to provide the family with additional information about what goals and objectives might be in an individualized program for the student.

We encourage each family to visit CTAC prior to filling out our application from to learn more about our instructional concepts and individualized curriculum. To make an appointment, contact Lindsey Allan at (512) 328-5599 or email: [lallan@ctac1.com](mailto:lallan@ctac1.com)
